DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 6, 7 and 9-12 stand rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 5,147,944 (Takeda) in view of U.S. 6,887,581 (Tamura et al) as per reasons of record.

Response to Arguments

3. Applicant's arguments filed October 5, 2007 with respect to Takeda have been fully considered but they are not persuasive. It is maintained that Takeda's disclosure clearly includes poly-meta-xylylene pimelamide resin. In this regard, it is noted that pimelic dicarboxylic acid is embraced by the reference's general disclosure of aliphatic dibasic acids having from 6-20 carbons. Applicants' reliance on the Exhibit A figure is noted but is given little weight since i) it is unclear as to whether or not the comparisons are back-to-back comparisons, i.e., all variables except for the polyamide resin are the same, ii) any alleged showing of superior results must be *unexpectedly* superior results and iii) the exhibit is not presented in declaration form.

Art Unit: 1796

4. Applicant's arguments, however, with respect to Tamura et al have been found persuasive. The 35 USC 102/103 and 35 USC 103 rejections over Tamura et al have been withdrawn.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
